HP xw8600 WORKSTATION

Extreme performance with unlimited possibilities

The HP xw8600 Workstation delivers the extreme performance that allows you to tackle the most demanding challenge. Building upon and advancing the performance and expandability of the widely successful HP xw8400, the HP xw8600 Workstation provides power, versatility and reliability for massive compute and visual capacity—giving you and your business a professional edge.

Extraordinarily powerful

The HP xw8600 takes high performance to the extreme delivering leading performance for computationally-intense applications. Meet your most demanding engineering, digital content creation, video and multimedia production challenges with the latest Intel® Dual-Core¹ and Quad-Core processors. Integrating the Intel® 5400 chipset, the HP xw8600 delivers 4x the graphics processing throughput capability of previous generation systems along with support for high-end graphics cards and multiple displays. The 80 PLUS high-efficiency power supply and low-power processors give you maximum compute power while making the most of every watt of power.

Uniquely versatile

The HP xw8600 has the greatest expandability and range of options in the HP Workstation family. Built on a space-efficient, tool-less chassis, the HP xw8600 is designed to make serviceability simple and comes with remote management and support capabilities that make your work life easier.

Like all of our workstations, the HP xw8600 is designed to run quietly and be less disruptive to your work environment. Choose from our leading Linux® support (simplified installation, dedicated Linux R&D team, single point of customer support) or a breadth of Microsoft® Windows®-based OS choices.

Definitively reliable

Work with greater confidence and improve the ability to focus on your job, with reliable HP Workstation engineering and certified solutions backed by world-class service and support. Extensive testing helps ensure the quality for which HP is renowned. In-depth engineering and technical relationships with ISVs to test and certify applications, OS, and hardware configurations assist in delivering faster, more reliable applications.

Warranty

Limited three-year next business day, parts, labor and 8x5 phone support; Terms and conditions may vary, certain restrictions apply.¹¹

¹ Certain Windows Vista product features require advanced or additional hardware. See <http://www.microsoft.com/windowsvista/getready/hardwarereqs.mspx> and <http://www.microsoft.com/windowsvista/getready/capable.mspx> for details. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit <http://www.windowsvista.com/upgradeadvisor>

² Available for end user customers that are a business (including governmental or educational institutions) who are expected to annually order at least 25 Customer Systems with the same Custom Image.

³ Quad-Core and Dual Core are new technologies designed to improve performance of multithreaded software products and hardware-aware multitasking operating systems and may require appropriate operating system software for full benefits; check with software provider to determine suitability. Not all customers or software applications will necessarily benefit from use of these technologies.

⁴ 64-bit computing on Intel® architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel 64 architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software.

⁵ Intel's numbering is not a measurement of higher performance.

⁶ GHz refers to internal clock speed of the processor. Other factors besides clock speed may impact system and application performance.

⁷ Actual bus clock rate is less. Listed bus speed represents the effective data transfer rate.

⁸ Hardware RAID is not supported on Linux systems. The Linux kernel, with built-in software RAID, provides excellent functionality and performance. It is a good alternative to hardware-based RAID. Please visit <http://h20000.www2.hp.com/bc/docs/support/SupportManual/c00060684/c00060684.pdf> for RAID capabilities with Linux.

⁹ 1 GB=1 billion bytes. Actual formatted capacity is less. Up to 8 GB of hard drive (or system disk) is reserved for the system recovery software (XP and XP Pro). Up to 12 GB of system disk is reserved for system recovery software. (Vista).

¹⁰ Actual speeds may vary. Does not permit copying of commercially available DVD movies or other copy-right protected materials. Intended for creation and storage of your original material and other lawful uses. Double Layer discs can store more data than single layer discs. However, double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players. LightScribe creates a monochrome image. LightScribe media required and sold separately.

¹¹ I/O card must also be Gen2 in order to realize PCI Express® Base 2.0 Specification (also known as PCIe Gen2) graphics performance.

¹² The term "10/100/1000" or "Gigabit" Ethernet indicates compliance with IEEE standard 802.3ab for Gigabit Ethernet, and does not connote actual operating speed of 1 Gb/sec. For high speed transmission, connection to a Gigabit Ethernet server and network infrastructure is required.

¹³ Service levels and response times for HP Care Packs may vary depending on your geographic location. Restrictions and limitations apply. For details, visit www.hp.com/go/carepack.
