#### Keeping you up to speed

Faxed documents can be sent round the world at a super-fast three seconds a page. There's no time wasted in receiving either. The L350 produces pristine laser prints at 6 pages per minute, even while you're scanning in faxes for sending. To make your communication even more instant, use the one-touch or coded speed dials to cut the number crunching out of the equation. And the faster you fax, the lower your telecommunication costs. When you're working to tight deadlines, the rapid L350 is a real lifeline.

#### A better business image

Run out your file-ready, laser printed, incoming documents on plain paper at an impressive 600dpi resolution. Scanning with equal clarity, the L350 ensures the finest detail for both sending and receiving. Readability of images and text is also improved by Canon's Ultra High Quality digital processing which renders crisp images in up to 64 shades of grey.

#### Increased working capacity

The L350 is designed to maximise workflow and minimise disruption. For your convenience it is able to accommodate a surprisingly large paper load of 350 sheets. The L350 is blessed with a 30 page Automatic Document feeder that makes large scale faxing a formality. In the unlikely event of paper or cartridge running out, the 160 page memory comes into play, storing incoming messages until they can be printed out. It also saves waiting when sending, by transmitting memorised messages when busy lines have cleared. Even when the power fails, the memory back-up can keep things up and running for an hour.

#### Designed with users in mind

The L350 is built to help you get the job done without dirtying your hands or rushing you off your feet. The paper is easy to load, the snap-in cartridge is maintenance free and the internal paper path saves a lot of jams - especially during rush hours! Better still, the advanced fax features and quick dialling codes are perfect for people who can't stand standing at the fax.

#### The neat way to fax, copy and print.

Designed to take up less of your time and your desktop, the compact and versatile L350 offers three office peripherals in one. Fax fast, copy at your leisure or use the optional printer connection for convenient desktop printing. Whatever your communication requirements, rely on the Canon L350.
