

PORTÉGÉ M200

Innovative tablet computing redefines working efficiency

Twist the screen to switch between notebook and tablet mode with one easy action. Writing and sketching has never been easier with the Portégé M200. The Portégé M200 combines digital ink technology in a high-performance convertible platform.

PERFECT BALANCE OF PERFORMANCE AND USABILITY

- Intel® Centrino™ mobile technology for seamless wireless connectivity and exceptional mobile performance
- Be more productive with up to four and a half hours battery life
- Ultra-portable and easy to carry at only 2.0kg
- Large storage capacity with a massive 60GB hard drive
- Brilliant 12.1" SXGA+ polysilicon screen
- Microsoft® Office OneNote™ 2003 plus a vast selection of software and utility tools for maximum productivity

DURABILITY AND ROBUST DESIGN

- The sturdy polysilicon display is more robust than other LCD panels for added peace of mind and investment protection
- The robust Dual Action swivel hinge is made from stainless steel for long life

FLEXIBLE PRODUCTIVITY

- Facilitates both traditional clamshell use with integrated keyboard or pure slate use with the arm
- The Tablet Multi-Dock provides dual display capability to run two separate applications on different screens
- Common docking available with the Advanced Port Replicator III

- The integrated Active Digitiser allows you to write and edit with accuracy directly on the display
- Easily switch between portrait and landscape modes at the touch of a button

STAY CONNECTED

- Easily connect to hotspots or business networks with integrated WiFi™ 802.11b/g
- Connect to your email or the Internet via the integrated Bluetooth™ antenna using a Bluetooth™ enabled phone
- Move between various work locations with greater ease using pre-installed Toshiba ConfigFree™ software

CPU performance may vary from specifications under certain conditions such as the use of battery instead of AC power, certain external peripherals, certain multimedia applications or network connections, complex modelling software and in areas with low air pressure at high altitude (1,000 metres above sea level) and/or certain temperatures. CPU performance may also vary from specifications due to design configuration. Under some conditions, your computer may automatically shut down as a normal protective measure. To avoid risk of lost data, please make periodic back-up copies. For optimum performance, use your computer only under recommended conditions. Please read detailed restrictions in the product resource guide, visit the Toshiba website: computers.toshiba-europe.com and/or contact Toshiba Technical Support. • One GB means one billion bytes. • Battery life may vary depending on applications, power management settings and features utilised. Recharge time varies depending on usage. Battery may not charge while computer is consuming full power. After a period of time, the battery will lose its ability to perform at maximum capacity and will need to be replaced. This is normal for all batteries. To purchase a new battery pack, see your accessories information that is shipped with your computer or visit the Toshiba websites at computers.toshiba.nl or computers.toshiba.be. • Small bright dots may appear on your TFT display when you turn on your PC. Your display contains an extremely large number of thin-film transistors (TFT) and is manufactured using high-precision technology. Any small bright dots that may appear on your display are an intrinsic characteristic of the TFT manufacturing technology.
